

I'm writing this letter in response to the NAB petition to stop XM satellite radio from broadcasting local weather and traffic conditions. In this country, we have the right of freedom of speech, and free enterprise. The NAB is receiving a fee for their services from advertisers, and XM radio is also providing me with this valuable information that I pay for. To restrict them creates a monopoly, giving the NAB sole rights to provide this information. This is NOT fair.

I urge you (the FCC) to reject the NAB's petition 04-160, and by doing so, keeping free enterprise strong in America.
